## I. Introduction

The Mission of the South Carolina Department of Health and Environmental Control (DHEC) is to *Promote and Protect the Health of the Public and the Environment* (<http://www.scdhec.gov/administration/library/CR-003160.pdf>). To accomplish this mission, DHEC's Environmental Quality Control (EQC) deputy area is granted statutory authority thru a variety of Federal and State Acts to develop and enforce environmental regulations. The United States Environmental Protection Agency (EPA) has granted primacy to DHEC for the enforcement of federal regulations. With the increased demand on natural resources and public awareness of the importance of environmental protection, regulations are recurrently promulgated to ensure the protection of public health and the environment.

DHEC's EQC deputy area consists of four main bureaus: Air (BAQ), Environmental Services (BES), Land and Waste Management (BLWM), and Water (BOW). In addition, EQC Administration oversees overall management and administrative functions of the deputy area. The Bureau of Environmental Services is comprised of eight regions, encompassing twelve regional offices. The regional offices provide numerous functions for DHEC and our customers, including regulatory oversight thru compliance inspections at permitted facilities and complaint response. SC Open Burning Regulation 61-62.2, *Prohibition of Open Burning* (Appendix I) prohibits the burning of any material in an outdoor fire, unless provided for in the regulation. The South Carolina Pollution Control Act (SC Code Ann. § 48-1-50) authorizes the Department to issue orders and assess monetary penalties (<http://www.scstatehouse.gov/code/t48c001.htm>). This regulation is one of very few Air

regulations that have a day-to-day impact and influence in the lives of the general public. The majority of Air regulations are geared toward permitted stationary sources. Open burning is often practiced as a means of disposal for numerous types of materials, including (but not limited to) household garbage, land clearing debris, tires, yard trimmings/leaves, waste oils, and construction/demolition debris.

## **II. Problem Statement**

The traditional, reactive approach to open burning is the compliant response investigation conducted by the EQC regional offices. Complaint response has long plagued the regional offices from a staff response and monetary expenditure perspective. The case-by-case handling of open burning incidents/complaints uses resources very inefficiently. Along with efficient uses of state resources, the ultimate goal is to reduce and eliminate the practice of illegal open burning activities across the state. A specific focus for this project will be on burning of household garbage, which is still practiced by many (predominantly rural) residents of South Carolina.

In terms of the current budget reductions being forced onto state agencies, the inefficiencies of the traditional complaint response approach to open burning needs to be evaluated and perhaps new methods of public education developed and implemented. Two recent initiatives promoted by EQC management to help permitted facilities remain in compliance include compliance assistance and public participation. As defined on the Agency's website, Compliance Assistance means "*activities, tools, or technical assistance services that provide clear and consistent information to help individuals, business, industry and government understand and meet, or surpass, their environmental obligations.*" (<http://www.scdhec.net/environment/admin/compass>) Public Participation is

defined as *"A full range of actions and processes that EQC uses to involve the public in our work."* (<http://www.scdhec.gov/environment/admin/htm/oech.htm>)

These initiatives could prove beneficial and vital to reducing open burning incidents.

While the regional office inspectors have a responsibility as compliance inspectors to report and document regulation violations, the argument can be made that staff can and should take a proactive approach to informing the public of pertinent regulations. This CPM project will look at data relating to the percent of total received complaints that deal with open burning and the amount of time and resources spent by the regional offices investigating these complaints.

### **III. Data Collection**

As stated previously, the goal of this project is to perform a cost analysis for the traditional approach to complaint response conducted the Bureau of Environmental Services. The data collected as part of this project came directly from EQC's Environmental Facility Information System (EFIS) database, BES and BAQ reported figures, a personnel cost computation and mileage reimbursement rates (State Appropriations Act for Fiscal Year 2009) by the Bureau of Financial Management. Vehicle miles traveled to conduct a complaint investigation will be an average for the respective regional office(s) due to geographical size variations for the regions. Data will be analyzed for Calendar Years 2004 – 2008 (thru June 30). The analysis will focus on the combined BES totals and the Florence office as a subset.

### **IV. Data Analysis**

Table 1 is a graphic illustration of all complaints received in each regional office for the referenced time periods (Appendix II). These complaints include incidents that

may not normally have an actual investigation associated with the report, such as Indoor Air and Sanitary Sewer Overflows (SSOs), but are required to be reported and documented. Yearly Incident/Complaint totals range from 6163 (in 2005) to 9267 (in 2007).

**Table 1 Total Incidents**

<i>Calendar Year Total Incidents Report</i>

<b>Total</b>	<b>6425</b>	<b>6163</b>	<b>7658</b>	<b>9267</b>	<b>4831</b>

Table 2 shows the number of Open Burning Incidents (by debris type) investigated by the regional offices (Appendix III). The two main complaint areas based on debris type are: household garbage (24.0%) and land clearing debris (25.3%).

**Table 2 Open Burning Incidents**

<i>Calendar Year Open Burning Incidents Report</i>							Total by Debris Type
	2004	2005	2006	2007	2008 (thru 06/30/08)

<b>Total Open Burning Complaints</b>	<b>919</b>	<b>892</b>	<b>888</b>	<b>1197</b>	<b>658</b>		<b>4554</b>

As the data in Table 3 clearly demonstrates, open burning incidents are a significant percentage of total complaints investigated by BES on a yearly basis, ranging from ~12-15 % (average of 13.38%). In addition, EQC staff is devoting a significant amount of man - hours each year investigating these complaints.

**Table 3 Staff Resources for Complaint Investigations**

Calendar Year	Total Complaints	Man-Hours	Open Burning Complaints	OB Man-Hours	OB Man-Days	OB - Household Garbage	OB-HG Man-Hours	OB-HG Man-Days	% OB (OB/Total)	% Household Garbage (HG/OB)
2004	6425	10876	919	2328	310.4	195	482	64.3	14.30%	21.22%
2005	6162	10392	892	2068	275.7	224	528	70.4	14.48%	25.11%
2006	7658	12133	888	2364	315.2	229	582	77.6	11.60%	25.79%

OB = Open Burning										
HG = Household Garbage										

For the most recent twelve-month reporting period (CY2007), data shows that BES investigated 1197 open burning incidents, requiring 3673 man-hours and 489.7 man-days to conduct these investigations.

The same basic trend previously observed hold true when analyzing data specifically related to the Region 4 – Florence office. Table 4 outlines data for the Florence office in terms of: Total Incidents, Open Burning Incidents, Open Burning Incidents relating to household garbage, incidents resulting in enforcement actions.

**Table 4 Florence Staff Resources**

Region 4 - Florence Office										
Calendar Year	Total Complaints	Man-Hours	Open Burning Complaints	OB Man-Hours	OB Man-Days	OB - Household Garbage	OB-HG Man-Hours	OB-HG Man-Days	% OB (OB/Total)	% Household Garbage (HG/OB)
2004	480	586	73	188	25.1	26	25.5	3.4	15.21%	35.62%
2005	457	625	124	290	38.7	52	51.5	6.9	27.13%	41.94%
2006	634	924	95	208	27.7	54	54	7.2	14.98%	56.84%
2007	704	1046	160	312	41.6	99	99	13.2	22.73%	61.88%
2008 (thru 06/30/08)	395	598	85	139.5	18.6	20	37	4.9	21.52%	23.53%
<b>Total</b>	<b>2670</b>	<b>3779</b>	<b>537</b>	<b>1137.5</b>	<b>151.7</b>	<b>251</b>	<b>267</b>	<b>35.6</b>	<b>20.11%</b>	<b>46.74%</b>

It should be noted that not all open burning investigations result in violations being documented because some open burning activities are permitted by the regulation. Data from BAQ illustrate the number of incidents that actually result in violations (Appendix IV) and the number of enforcement referrals (Appendix V). Table 5 compares total open burning complaints, violations, and enforcement actions:

**Table 5 Open Burning Violations and Enforcement Actions**

Open Burning Violations and Enforcement Actions						
Calendar Year	Open Burning Complaints	Violations	Enforcement Actions	% Violations	% Violations Resulting in Enforcement Actions	
2004		919	566	28	61.59%	4.95%
2005		892	547	33	61.32%	6.03%
2006		888	495	47	55.74%	9.49%
2007		1197	580	46	48.45%	7.93%
2008 (thru 06/30/08)		658	405	50	61.55%	12.35%
<b>Total</b>	<b>4554</b>	<b>2593</b>	<b>204</b>	<b>56.94%</b>		<b>7.87%</b>

The normal complaint investigation procedure involving a cited violation results in a Notice of Violation (NOV) being issued to the Responsible Party (RP) by the regional office. First time offenders are not normally brought in for a formal enforcement action with Bureau of Air Quality- Enforcement staff. Repeat violators are referred to Bureau of Air Quality- Enforcement Section for resolution. These referrals could result in a "Dead-End" NOV (where the Department decides not to pursue further action), Notice of Alleged Violation/Enforcement Conference with No Further Action, referrals that result in Consent Orders (including possible civil penalties), or referrals resulting in an Administrative Order. The recidivism rates for offenders ranged from 4.95% to 12.35% (average rate of 7.87%) (See Table 5). Based on these figures, compliance rates are extremely high once the public has been informed of open burning regulations.

In order to calculate a monetary expenditure for conducting investigations, EQC Administration and the Bureau of Financial Management were consulted as a resource to determine a base salary amount for staff time (including fringe benefits) and a vehicle/travel cost, which is another significant incurred expense. Staff conducting open burning investigations are generally entry level Environmental Health Manager I positions. EQC administration recommends using the entry level EHM I salary to calculate personnel cost for this project (Appendix VI).

Staff time (reflected as man-hours or man-days) is one component of the costs associated with incident investigation. Vehicle/fuel costs are also a significant resource expenditure. As recognized by the Bureau of Financial Management, Federal Internal Revenue Service (IRS) guidelines for mileage reimbursement rates to individuals driving personal cars on company business are developed to allow for fuel cost, maintenance and

depreciation of the vehicle (Appendix VII). Current IRS allowable mileage reimbursement rates will be used to calculate expenditures associated with travel costs. Since regional offices cover unique geographical areas based on the number of permitted facilities, an average distance to conduct a complaint investigation will have to be assumed to perform a valid calculation. Given the fact that the range of distance to travel to a complaint response can vary significantly (5-50+ miles in some regions), with most regional offices, a conservative radius of 20 miles can be used as an "average" travel distance to conduct an investigation. Using this travel cost along with direct personnel cost, the following cost analysis for conducting open burning by the BES (Table 6) and the Florence office (Table 7) is determined:

**Table 6 Total Monetary Expenditures for Open Burning**

Total Amount of Resources Spent on Open Burning - All Regions							
Calendar Year	Open Burning Complaints	OB Man-Hours	OB Man-Days	Personnel Cost	Vehicle Cost	Total Cost per Year	
2004	919	2328	310.4	\$45,792	\$18,564	\$64,356	
2005	892	2068	275.7	\$40,677	\$18,018	\$58,695	
2006	888	2364	315.2	\$46,500	\$17,938	\$64,438

Combined Personnel/Vehicle Cost				<b>\$78,655</b>		
Personnel Cost = OB man-hours x \$19.67/hour						
Vehicle Cost = # incidents x 40 round trip miles/incident x 50.5 cents per mile						

**Table 7 Florence Office Monetary Expenditures for Open Burning**

Total Amount of Resources Spent on Open Burning - Region 4- Florence Office							
Calendar Year	Open Burning Complaints	OB Man-Hours	OB Man-Days	Personnel Cost	Vehicle Cost	Total Cost per Year	
2004	73	188	25.1	\$3,698	\$1,475	\$5,173	
2005	124	290	38.7	\$5,704	\$2,505	\$8,209	
2006	95	208	27.7	\$4,091	\$1,919	\$6,010	
2007	160	312	41.6	\$6,137	\$3,232	\$9,369	
2008 (thru 06/30/08)	85	139.5	18.6	\$2,744	\$1,717	\$4,461	
<b>Total</b>	<b>537</b>	<b>1137.5</b>	<b>151.7</b>	<b>\$22,374</b>	<b>\$10,848</b>		
Combined Personnel/Vehicle Cost				<b>\$33,222</b>			

Calendar Year	OB - Household Garbage	OB-HG Man-Hours	OB-HG Man-Days	Personnel Cost	Vehicle Cost	Total Cost per Year	
2004		10	25.5	3.4	\$501	\$202	\$703
2005		24	51.5	6.9	\$1,013	\$485	\$1,498
2006		25	54	7.2	\$1,062	\$505	\$1,567
2007		48	99	13.2	\$1,947	\$970	\$2,917
2008 (thru 06/30/08)		20	37	4.9	\$728	\$404	\$1,132
Totals		127	267	35.6	\$5,251	\$2,566	
Combined Personnel/Vehicle Cost				\$7,817			
Personnel Cost = OB man-hours x \$19.67/hour							
Vehicle Cost = # incidents x 40 round trip miles/incident x 50.5 cents per mile							

Based on the conservative cost estimates stated above, the Bureau of Environmental Services has spent \$338,366 investigating open burning complaints over the past 4.5 years (or \$75,192 per year). Data specific to the Florence office reveals expenditures of \$33,222 (or \$7,383 per year) for the same time period. The expenditures are probably significantly more due to the fact that Air staff generally does not stay at the entry-level salary for an extended time period. The total number of open burning complaints for the referenced time period is 4554. Using one responsible party per incident as the “benefit”, the cost / benefit ratio for the 2004 – June 2008 time period calculates as:  $\$338,366 / 4554 = \$74.30$ . The data clearly supports the assertion that the traditional complaint response approach is very inefficient in terms of expenditures per audience reached. The consensus has been that most people are aware that open burning of certain materials is prohibited. However, the data shows that complaint numbers continue to stay level and given the fact that the recidivism rate is extremely low without the assessment of a civil penalty, most customers comply with Regulation 61-62.2 once they are educated and informed.

## **V. Implementation Plan**

Potential solutions to address the open burning issues include: writing tickets “on the spot” (requires staff to be certified as law enforcement officers thru the criminal justice academy and a change from open burning regulation to state law), elimination/repeal of the open burning regulation (considered an environmental “step backward”), or shifting enforcement responsibilities to another government entity (such as local governments). None of these are a financially feasible or politically viable option. Data clearly supports the assertion that education, outreach, and compliance

assistance yields the desired outcome as reflected by the low recidivism rate. These strategies are an innovative, proactive process and hopefully will prove to be effective tools.

The implementation plan for this project consists of conducting an Open Burning Pilot Project in Chesterfield and Darlington Counties in the fall of 2008. A specific target of this pilot is to address the issue of open burning household garbage (“burn barrels”) as a means of disposal. This practice is still employed by numerous residents in South Carolina; reflective of the large number of burn barrels in these two counties. Residents pay for disposal of their burn ash at the local convenience centers in Chesterfield County (Attachment 1). It should be noted that the County does not promote open burning but is simply trying to prevent forest fires that are often generated by illegal dumping of the burn ash. This project will develop, implement, and evaluate new compliance assistance/outreach strategies to inform the public that this activity is not only illegal but also harmful to their health. The DHEC project team consists of staff from BES – Region 4 Florence office, Bureau of Air Quality – Planning, Outreach and Technical Management Sections, Media Relations, and Communication/Photography. In order to tap potential outside funding sources for underwriting production costs, Region 4 Florence staff contacted and discussed the project with personnel from Chesterfield and Darlington Counties, *The Link* newspaper, and radio station WCRE – Cheraw. Each entity expressed their desire to participate as an active member on this venture with time and resource commitments. The forging of external stakeholder relationships with parties expressing a vested interest in eliminating open burning not only provides a sense of

ownership for the partners, but also functions as a means for acquiring outside revenue sources.

Florence Air staff and BAQ staff met in late spring/early summer 2008 to formulate ideas for implementation (Attachment 2). Discussions were then held with external stakeholders and partners to solicit their input and support. Numerous compliance assistance strategies were decided upon as a starting point. Ultimately the following strategies were developed and implemented:

- ✓ Newspaper Ad - *The Link* (Attachment 3)
- ✓ Press Release (Attachment 4)
- ✓ Radio Public Service Announcement (on CD)
- ✓ Chesterfield County Website Link to Public Service Announcement (Attachment 5)
- ✓ Live on-air radio interview with WCRE
- ✓ Scrolling Marquee (Darlington County Courthouse) (on CD)
- ✓ Metal Signs for convenience sites (Attachment 6)
- ✓ Flyer/Handout (Attachment 7)
- ✓ General outreach to schools, students at Nucor Steel Earth Day, Coker College and local fire departments

Production costs incurred with these strategies were absorbed by all entities involved. Due to funding issues on some products, the strategies were implemented over a broader timeframe than originally scheduled. Two final products, flyers and metal signs, were not produced and put into position until November 2008. Table 8 is a graphic illustration of information that will be utilized in judging pilot evaluation and effectiveness:

**Table 8 Pilot Project Evaluation and Effectiveness**

Open Burning Pilot Evaluation and Effectiveness							
Strategy	DHEC Staff Time (hours)	DHEC Personnel Cost	DHEC Production / Travel Cost	External Production Cost	Potential Audience Reached	Total Cost per Strategy	# Evaluation Responses
Newspaper Ad		\$0.00				\$0	
Press Release		\$0.00				\$0	
Radio PSA		\$0.00				\$0	
Chesterfield Website Link		\$0.00				\$0	
Radio Interview		\$0.00				\$0	
Scrolling Marquee		\$0.00				\$0	
Metal Signs		\$0.00				\$0	
Flyer/Handout		\$0.00				\$0	
General Outreach		\$0.00				\$0	
Total	0	\$0	\$0.00	\$0.00	0	\$0	0
Total DHEC Expenditures		\$0.00					
DHEC Cost = hours x \$19.67 per hour							
Travel Cost = mileage x 50.5 cents per mile							

Complaint Trends	# Open Burning Complaints		# Open Burning Complaints		Burn Box Empties	
County	FY 2008	Average Per Month	FY 2009	Average per Month	FY 2008	FY 2009
Chesterfield County		0		0		
Darlington County		0		0	N/A	N/A
Combined Pilot Counties	0	0	0	0	N/A	N/A
Control Group		0		0	N/A	N/A
Control Group = (Dillon, Florence, Marion, Marlboro Counties)						
Personnel Cost = OB man-hours x \$19.67/hour						

Convenience site traffic data for Darlington County will be obtained from County tabulations (Appendix IX). Based on information obtained from the US Census Bureau website, household demographics for Chesterfield County

(<http://quickfacts.census.gov/qfd/states/45/45025.html>) and Darlington County (<http://quickfacts.census.gov/qfd/states/45/45031.html>) will be used to calculate a value for site visits to convenience/recycling centers. Using the number of county households and dividing by the number of cars/week, a % of households using the sites will be determined and used as a basis for Chesterfield County convenience site visits.

## **VI. Evaluation Methodology**

Measuring and evaluating effectiveness and success for this pilot will be critical to ascertain which methods were most productive in reaching the desired audience. Even though some methods may prove to be beneficial on a large scale, a “one size fits all approach” should not be expected due to numerous demographic populations and socio-economic levels of our customers. Along these lines, this pilot should be viewed as a dynamic process with an ongoing, direct evaluation and assessment process. Evaluation data will continue to be collected and analyzed for a 12-month time frame (ending November 2009) to compensate for seasonal variations. The data for Chesterfield and Darlington Counties will be compared to the control group counties of Florence, Dillon, Marion and Marlboro for complaint trend analysis. Pilot evaluation will be accomplished using the Table 8 format and will include:

- ✓ Evaluation Questions to be asked of the Complainant (Attachment 8) and the Responsible Party (Attachment 9)
- ✓ Ongoing analysis of complaint trends in the two pilot counties to a control group (4 remaining counties for the Region 4 – Florence Office) – EFIS database
- ✓ Collection of Global Positioning System (GPS) coordinates and incorporation into Geographic Information Systems (GIS) overlays thru BAQ

✓ Tracking of “ash disposal burn box” empties by Chesterfield County

Based on these evaluations and incorporating the public participation element, additional outreach efforts will be developed utilizing input from our customers. Customers can not only provide insight into which outreach methods may prove successful for a given area, but also may reveal reasons for the continued practice of conducting open burning (location of convenience sites, “have always burned our trash”, unaware of regulations, monetary issues, etc.). This data will prove helpful to explore disposal options and solutions. In addition, GIS overlays will help delineate future focus areas. There will be costs associated with any strategies, however, some expenditure will be one-time expenses (not recurring money) and the external stakeholders will absorb some costs. Another down-side to these efforts may be an initial increase in complaint numbers for the regional offices, however, given the low recidivism rates expressed by the data, compliance rates would expect to increase with knowledge of the regulations and ultimately open burning incidents should be reduced or eliminated.

## **VII. Summary and Recommendations**

In conclusion, EQC is spending a significant amount of time and resources conducting open burning investigations. Continued development of outside stakeholder relationships (environmental groups, state/local government, community groups, etc.) will be fundamental to securing external funds for outreach strategies. With continued reductions in state appropriations, the development and implementation of education, compliance assistance and outreach strategies are a viable and efficient approach to informing the public of open burning regulations and will be a critical component for reducing or eliminating open burning as an accepted practice of waste disposal.

## Appendix I

## South Carolina Open Burning Regulation 61-62.2

**SOUTH CAROLINA  
DEPARTMENT OF HEALTH AND ENVIRONMENTAL CONTROL  
AIR POLLUTION CONTROL REGULATIONS AND STANDARDS  
REGULATION 61-62.2  
PROHIBITION OF OPEN BURNING**

**OPEN BURNING IS PROHIBITED EXCEPT AS PROVIDED BELOW:**

### **SECTION I - Exceptions**

- A. Open burning of leaves, tree branches or yard trimmings originating on the premises of private residences and burned on those premises.
- B. Open burning in connection with the preparation of food for immediate consumption.
- C. Campfires and fires used solely for recreational purposes, ceremonial occasions, or human warmth. Fires set for the purpose of human warmth must use only clean wood products (woody vegetation, leaves, or wood which is not coated with stain, paint, glue or other coating material, and not treated lumber).
- D. Fires purposely set in accordance with Smoke Management Guidelines for Vegetative Debris Burning Operations in South Carolina, administered by the South Carolina Forestry Commission and acceptable to the Department to include the following:
1. Prescribed burning of forest lands for specific management practices; and
  2. Fires purposely set for agricultural control of diseases, weeds, pests, and for other specific agricultural purposes.
  3. Open burning of trees, brush, grass and other vegetable matter for game management purposes.
- E. Open burning in areas other than predominantly residential for the purpose of land clearing or right-of-way maintenance. This will be exempt only if the following minimum conditions are followed:
1. The location of the burning must be a sufficient distance but not less than 1000 feet, from public roadways and all residential, commercial, and industrial sites not a part of the contiguous property on which the burning is conducted.
  2. Winds during the time of the burning must be away from any area in which the ambient air may be significantly affected by smoke from the burning if that area contains a public roadway or a residential, commercial, or industrial site.
  3. The material to be burned must have been generated onsite and not moved to the site from another location;
  4. The amount of dirt on the material being burned must be minimized;
  5. No heavy oils, asphaltic materials, items containing natural or synthetic rubber, or any materials other than plant growth may be burned;
  6. The initial burning must be started only between the hours of 9:00 a.m. and 3:00 p.m.; no combustible material may be added to the fire between 3:00 p.m. of one day and 9:00 a.m. the following day;
  7. No more than two piles 30' x 30' or equivalent may be burned within a six-acre area at one time; and
  8. In the case of land clearing, all salvageable timber and pulpwood must be removed.
- F. Fires set for the purposes of training fire-fighting personnel and conducted at permanent fire-fighter training facilities. Prior Department approval is required in order to obtain the exemption as a permanently established training site. Fires set for the purpose of fire-fighter training at non-permanent locations must receive Department approval prior to the initiation of any burning activity. Materials used for fire-fighter training cannot contain asbestos, heavy oils, asphaltic material, plastic or rubber without express written consent from the Department.
- G. Open burning on the property where it occurs of residential construction waste from building and construction operations will be exempt only if the following conditions are met:
1. The material being burned is residential construction waste associated with the building and construction of one and two family dwellings only;
  2. The location of the burning is at least five hundred (500) feet from any occupied structure other than a dwelling or structure located on the property on which the burning is conducted;
  3. Heavy oils, treated wood products, asphaltic materials, items containing natural or synthetic rubber, or any other trade wastes which produce smoke in excess of forty (40) percent opacity are not burned;
  4. The burning does not occur during the ozone season (April 1 through October 30); and
  5. The burning is conducted only between the hours of 9:00 a.m. and 3:00 p.m.;
- H. Open burning, in remote or specified areas:
1. For non-recurring unusual circumstances.
  2. For experimental burning for purposes of data gathering and research.
- However, prior approval for these types of burning (in subparagraph H above) must be obtained from the Department.

### **SECTION II - General**

- A. A written report or warning to a person of a violation at one site shall be considered adequate notice of the Regulation and subsequent observed violations at the same or different site will result in appropriate legal action.
- B. Open burning may be conducted in certain situations if no undesirable levels are or will be created. The authority to conduct open burning under this Regulation does not exempt or excuse the person responsible for the burning from the consequences of or the damages or injuries resulting from the burning and does not exempt or excuse anyone from complying with other applicable laws and with ordinances, regulations, and orders of governmental entities having jurisdiction, even though the burning is otherwise conducted in compliance with this Regulation.
- C. The Department reserves the right to impose other or different restrictions and exemptions on open burning in addition to those enumerated above, whenever in the judgment of the Department such is necessary to realize the purpose of this Regulation.

#### **R. 61-62.2 History - South Carolina State Register:**

Vol. 9, Issue No. 5, (Doc. No. 457), May 24, 1985.  
Vol. 28, Issue No. 6, (Doc. No. 2872), June 25, 2004.

## BAQ Open Burning Violations

Subject: Fwd: Re: Open Burning Enforcement Referrals  
Cindy Kilpatrick 10/9/2008 4:26 PM

Buck....here's the info that we currently have in the system:

2004 - 566  
2005 - 547  
2006 - 495  
2007 - 580  
2008 (thru 06/30/08) - 405

.....these numbers all came from querying EFIS .....let me know if I can assist further.....Cindy

>>> Buck W. Graham 10/09/08 9:57 AM >>>

Hi Randy and Cindy,

Keith Frost had directed me to both of you for some information/help.... As you can see below, I need some info./data from BAQ for my CPM project...I have run Incident reports for some of my data but need some assistance to complete my analysis...I would appreciate any assistance you can provide with the requested info. below.... Please let me know if you can help, I would like to have this info. within the next 1-2 weeks if possible....THANKS....Buck

>>> Buck W. Graham 9/29/2008 5:07 PM >>>

Hey Keith,

Hope things are going well...Have a request: I'm working on my CPM project (Cost/Benefit Analysis of Open Burning Investigations/Enforcement vs. Compliance Assistance Strategies). How can I find out the # of open burning violations and the # of enforcement cases for each respective office, on a calendar year basis, for the years 2004- 2008(June 30)?...I can find an incident summary in EFIS, but can't seem to locate the # of violations/referrals....I would like to ask for your assistance as well in determining the amount of resources your staff spend preparing and conducting open burning enforcement cases..I plan to get with Mary Bannister for a formula to determine a "personnel cost" for each hour spent on open burning...The intent is to use this info. along with =resources spent by BES to determine how much the Agency is "spending" on this issue and then evaluate the potential effectiveness of using alternative compliance assistance strategies ...Please let me know if you can assist me in this area... Thanks....Buck

## BAQ Open Burning Enforcement Projects

From: Randy Stewart

Wednesday - October  
29, 2008 4:28 PM

To: Graham, Buck W.

Subject: Fwd: Re: Open Burning Enforcement Referrals

Open Burning Enforcement Projects 2003.doc (29696 bytes) [\[View\]](#) [\[Open\]](#) [\[Save As\]](#)  
Attachments:

Buck:

Attached are the open burning violation numbers pulled out of EFIS. These numbers indicate the number of central office NOV's that were issued. Some of these resulted in orders with penalties and some did not. I haven't figured out the amount of resources spent on these cases yet. I'll get that to you ASAP. Sorry for the delay in getting this to you - took a little longer than I thought and I was out of town last week.

>>> Buck W. Graham 10/9/2008 9:57 AM >>>

Hi Randy and Cindy,

Keith Frost had directed me to both of you for some information/help....As you can see below, I need some info./data from BAQ for my CPM project...I have run Incident reports for some of my data but need some assistance to complete my analysis...I would appreciate any assistance you can provide with the requested info. below....Please let me know if you can help, I would like to have this info. within the next 1-2 weeks if possible....THANKS....Buck

>>> Buck W. Graham 9/29/2008 5:07 PM >>>

Hey Keith,

Hope things are going well...Have a request: I'm working on my CPM project (Cost/Benefit Analysis of Open Burning Investigations/Enforcement vs. Compliance Assistance Strategies). How can I find out the # of open burning violations and the # of enforcement cases for each respective office, on a calendar year basis, for the years 2004 - 2008 (June 30)?...I can find an incident summary in EFIS, but can't seem to locate the # of violations/referrals....I would like to ask for your assistance as well in determining the amount of resources your staff spend preparing and conducting open burning enforcement cases..I plan to get with Mary Bannister for a formula to determine a "personnel cost" for each hour spent on open burning...The intent is to use this info. along with resources spent by BES to determine how much the Agency is "spending" on this issue and then evaluate the potential effectiveness of using alternative compliance assistance strategies ...Please let me know if you can assist me in this area...

Thanks....Buck

Buck W. Graham, Jr., Program Manager

## Appendix VI

## Personnel Salary /Fringe Benefits

Subject: Re: Fwd: Cost  
Date: Thu, 16 Oct 2008 13:59:19 -0400  
From: "Debra Lybrand" <LYBRANDW@dhec.sc.gov>  
To: "Buck W. Graham" <GRAHAMBW@dhec.sc.gov>  
Cc: "Ronnie P. Belleggia" <BELLEGRP@dhec.sc.gov>

Buck,  
Ronnie Belleggia in Financial Mgt. forwarded this to me. To be honest, we don't have information in the format you're wanting. I'll try to do the best I can to help you figure out some cost.

I would assume that most of the individuals responding to open burning issues are EHM I's. So, I'm going to provide the current hiring level with a 30% fringe rate. From this we can devise an hourly rate that can apply to hours found in EFIS.

EHM I Salary \$31,484

Fringe @ 30% \$9,445

Total Cost \$40,929

\$40,929 divided by 2,080 hours equals \$19.67 hourly rate

As far as the vehicle/fuel cost, that's much harder to determine. In EQC we track expenditures by vehicle and really don't have an "average". I would suggest using the same reimbursement rate per mile that the state uses to reimburse individuals. This is supposed to cover depreciation, gasoline, etc.

Hope this helps,  
Debra Lybrand  
Administrative Manager  
Environmental Quality Control Administration

## **Appendix VII     Mileage Reimbursement Rate for FY09**

Subject: Mileage Reimbursement Rate Increase for FY09  
Date: Mon, 30 Jun 2008 13:03:03 -0400  
From: "Mary B. Long" <LONGMB@dhec.sc.gov>

This email has been approved for distribution to DHEC\_All. If it doesn't apply to you, please delete with my apologies.

We received notification via the State Appropriations Act for FY09 that the mileage reimbursement rate will increase effective July 1, 2008.

**The rates for regular mileage will increase from 44.5 cents to 50.5 cents per mile.**

The rates for reduced mileage will increase from 40.5 cents to 46.5 cents per mile.

These rates will go into effect July 1, 2008, however, the TravWin Program will not be updated to reflect this change until on or about July 17, 2008. This is to allow time to complete processing of travel for FY08. Travel for FY09 should not be entered into the TravWin system until the rates have been changed. Notification will be sent out once the TravWin system has been updated for the change.

If you have any questions for concerns, do not hesitate to contact me.

Thank you

\*Rain on Thursday & Friday

**Attachment 2****Pilot Project Strategy Development Meeting**

April 3, 2008 @ 01:30 pm

**Open Burning Pilot Project – EQC Region 4 - Florence**

BAQ, Columbia, SC

**Participants:** Buck Graham, Keith Lane, Cindy Kilpatrick, Melinda Mathias, Amy Curran, Leslie Coolidge,**Minutes**

**Meeting Purpose :** Discuss education/outreach efforts with BAQ staff. Specific discussion: develop ad for newspapers, metal signs to post at convenience sites, OB press release, incorporating OB Handout in waste disposal bags (Darlington County), development of local OB ordinance in Darlington County.

**Discussion:**

## Ad for newspaper

- Ad will be based on message in OB flyer and will be 1/4 page.
- Will incorporate 3R message – Reduce, Reuse, and Recycle.
- BAQ will work on Ad format. Also will check on BAQ funds, if needed, to match County for larger (1/2 page) ad
- Ads will be in Chesterfield County (3 papers total) and Darlington County (Darlington & Hartsville papers).

## Open Burning Ordinance

- Darlington County is interested in drafting an open burning ordinance.
- Keith and I will be meeting with Solid Waste group from Darlington County to discuss ordinance – date has not been set.
- BAQ will provide assistance as needed with this effort.

## Handouts/Flyers in Boxes of Yellow bags

- Darlington County is willing to have OB Handouts placed in boxes of yellow disposal bags.
- County looking into cost of printing OB Handout on each bag.

## Metal Signs

- Metal signs with OB Handout will be developed. BAQ will check on having Dept. of Corrections produce signs and the estimated cost/funding.
- Signs will be placed at convenience sites and transfer stations in both counties.

## Press Release

- OB press release will be going out in conjunction with newspaper ads.

## Posters

- BAQ will explore potential for having posters made which can be distributed to local physician offices, hospitals, etc.

## Magnets/Bumper Sticker

- Amy will talk with Jane Hiller of SONOCO in ref. to funding printing of bumper stickers. Jane did not think magnets would be as acceptable.

## Websites

- Chesterfield County has offered to include a section on open burning on its Website. Region 4 staff will get with county and discuss in greater detail.

**Summary:** Numerous strategies are being developed/implemented to address burn barrels. Updates will be provided as we proceed forward.

**Path Forward**

**Next Order of Business:** BAQ and Region 4 staff working on feasibility and implementation.

**Next Steps: Strategy Development**

	Person(s) responsible	Deadline
✓ Develop ad for newspapers	BAQ, Region 4 - Florence	June1, 2008
✓ Meet with Darlington County – placing handouts in containers or printing on disposal bags.	Region 4 - Florence	June1, 2008
✓ Metal signs w/ OB handout images to be posted at convenience sites in each county.	BAQ	June1, 2008
✓ Poster for distribution at medical facilities.	BAQ	June1, 2008
✓ Work with Darlington County to develop Open Burning Ordinance.	Region 4 – Florence, BAQ	TBD
✓ Bumper stickers – Amy will continue to pursue interest with SONOCO.	Amy Curran	June1, 2008

# Think before you burn.

**In South Carolina, it is against the law** to burn household garbage! Common household items such as cardboard, metal cans and paper are illegal in an outdoor fire. Burning has been a common way to get rid of leaves and tree limbs, to clear farm lands, and to manage wildlife areas. However, smoke from open burning can pollute the air and cause health problems. That is why there are State laws to limit outdoor burning.

South Carolina allows certain kinds of open burning if the burning does not cause problems and if it is not prohibited by local governments.

**A good rule to follow is: If it doesn't grow, don't burn it.**

## Did you know its against the law to burn these materials in an outdoor fire?

### • Household Garbage

- Plastics
- Paper
- Treated Wood
- Cardboard
- Construction Debris

### • Household Chemicals

- Paint
- Tires
- Asphalt
- Petroleum
- Dead Animals

For more information on open burning regulations, you can call the DHEC Region 4 Florence office at (843) 661-4825 or visit [www.scdhec.gov/baq](http://www.scdhec.gov/baq).

## Region 4 – Florence Open Burning Press Release

### FOR IMMEDIATE RELEASE

June 30, 2008

#### Pee Dee residents urged to avoid open burning

COLUMBIA - Citizens in the Pee Dee region of South Carolina should explore alternatives to burning their yard trash, the state Department of Health and Environmental Control announced today.

"Smoke from these fires is a serious threat to the environment and it can be troublesome for people with respiratory problems like asthma," said Buck Graham, program manager of DHEC's Environmental Quality Control Region 4 Florence office. "It is illegal to burn certain items in South Carolina and the practice of using a burn barrel in your backyard is also illegal."

According to Graham, it is against the law in South Carolina to burn the following items:

- Household garbage and trash
- Paper and cardboard
- Motor and waste heating oils
- Roofing materials, such as shingles and tar
- Tires and other rubber products
- Plastics
- Paints
- Household cleaners
- Farm chemicals
- Electrical wire
- Insulation and ductwork

"The state regulation that prohibits open burning was revised several years ago as part of South Carolina's Early Action Compact process to improve air quality," Graham said. "These rules are designed to help improve air quality and to protect public health. The ultimate goal is to reduce smoke and other emissions that contribute to air pollution."

Graham said homeowners can generally burn yard trimmings, like leaves and branches, if local ordinances allow it and it does not cause a public nuisance. Other allowed burning includes fireplaces, campfires, and outdoor barbecues and bonfires for festivals and other occasions."

"An alternative to burning yard waste is composting," said Keith Lane, environmental health manager in the DHEC Region 4 Florence office. "This consists of recycling leaves, grass clippings, weeds, brush, kitchen scraps and other organic waste by maintaining the waste in a pile and allowing it to decompose naturally."

-more-

According to Lane, the compost can be used in gardens and mixed in with other soils to return important nutrients to the ground. Recycling is a preferred alternative to disposal in a landfill for much of the material that can't be burned.

More information on recycling and composting is available on DHEC's Web site at:

<http://www.scdhec.gov/environment/lwm/recycle/>.

For more information, or to report illegal open burning, call DHEC's Region 4 Environmental Quality Control office in Florence at (843) 661-4825.

## Pilot Evaluation Questions - Complainant

### Region 4 – Florence Open Burning Pilot Project

#### Evaluation Questions

##### Questions to be asked of those calling....

1. Are you calling for information and/or to report open burning?
2. In what county do live?
3. "Complaint" call questions to be asked:      Location/Type of burning  
Responsible Party Information

##### Complainant Information

4. Where did you get the number to call?
  - News paper Advertisement/Article
  - Press Release
  - Sign at a recycling center
  - Scrolling Marque
  - Flyer
  - Radio PSA
  - Radio Interview
  - Fire Department
  - County Website
  - DHEC Website
  - Other (specify):
5. Can you suggest any other ways that we might consider using to encourage people to cease open burning?

The following questions are completely voluntary but will help the Department in evaluating the effectiveness of this project: Your responses are anonymous and will not be used for anything other than helping to evaluate this project.

6. Do you know of any ways that open burning can affect people's health?
7. Are you aware of anyone with health issues such as asthma and/or other respiratory illnesses that may be bothered by open burning?
8. In the past, have you ever burned any of these materials in an outdoor fire?  
(household garbage, plastics, paper, treated wood, cardboard, construction debris, household chemicals, paint, tires, shingles, petroleum, dead animals)
9. Did you know it is illegal to burn household garbage (and/or plastics, paper, treated wood, cardboard, construction debris, household chemicals, paint, tires, shingles, petroleum, dead animals)?
10. Do you live in this area or were you traveling through?
11. How far do you live from the nearest convenience/recycling center?
12. What is your age range: <25, 25-40, 41-60, >60?

**Attachment 9**

**Pilot Evaluation Questions – Responsible Party**

**Region 4 – Florence Open Burning Pilot Project  
Evaluation Questions**

**Questions to be asked of responsible party....**

1. Did RP know it is illegal to burn household garbage (and/or plastics, paper, treated wood, cardboard, construction debris, household chemicals, paint, tires, shingles, petroleum, dead animals)?
2. RPs primary reason for conducting open burning
3. How far is RP from local convenience and/or recycling center?
4. Is RP aware of recycling efforts and do they participate in recycling?
5. Does RP know that open burning can affect people's health?
6. Can RP suggest ways that we might consider using to encourage people to cease open burn?
7. Age range of RP: <25, 25-40, 41-60, >60
